

F2

10. (Five-Times Amended) A system for producing and processing a paper document, comprising:

- token generating means for generating user-selectable tokens relating to at least one other document, the other document being an electronic document, for purposes of linking the other document;
- encoding means for encoding the generated tokens;
- printer means for printing the encoded tokens onto the paper document; and
- a selector means for selecting one or more of the user-selectable tokens that have been decoded from a list of decoded tokens.

F3

19. (Five-Times Amended) A method for producing and processing a paper document, comprising:

- generating user selectable tokens relating to at least one other document, the other document being an electronic document, for purposes of linking the other document;
- encoding the generated tokens;
- printing the encoded tokens onto the paper document; and
- selecting one or more of the user-selectable tokens that have been decoded from a list of decoded tokens.

F4

28 (Amended) A system for processing a paper document, comprising:

- a scanner that reads embedded tokens in the paper document;
- a segment token decoder that receives image data from the scanner and identifies and decodes the tokens in order to generate a list of decoded tokens; and
- a token selector that allows a user to select which decoded tokens to access from the list of decoded tokens.
